Research Experience

Combating Flaky Tests. Advisors: Profs. Darko Marinov (UIUC) and Tao Xie (PKU) **July 2020 – Present**

- Analyzed theoretically and improved flaky-test detection (resulted in publication 1)
- Extended Java PathFinder to detect polluter tests (resulted in publication 2)
- Counted test orders for order-dependent flaky tests using Alloy (resulted in publication 3)
- Proposed, detected, and fixed non-idempotent-outcome tests that contain latent flakiness (resulted in submission 7)

Regression Test Prioritization. Advisors: Profs. Darko Marinov (UIUC) and Tao Xie (PKU) **April 2021 – Present**

- Analyzed theoretically random regression test prioritization (resulted in submission 5)
- Addressed important aspects overlooked by prior work and proposed a new metric (resulted in submission 6)

Bit-Flip Fault Injection. Advisors: Profs. Cyrille Artho (KTH) and Pavel Parízek (Cuni.cz) **July 2021 – Present**

- Extended Java PathFinder to systematically inject and explore bit-flip faults using Java PathFinder
- Work done in Google Summer of Code (GSoC) 2021, in preparation for submission (Project Website)

Data Stream Processing. Advisor: Prof. Tong Yang (PKU) **Oct 2019 – July 2020**

- Designed efficient data structures that memorize recent events with higher accuracy (resulted in publication 4)
